Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-26, 78-82, 90-98, 105, and 107-111, are rejected under 35 U.S.C. 102(b) as being anticipated by Henshaw et al. (US 4,407,712 A).
8. This reference, cited in international application PCT/US2005/000606, teaches the invention of these claims as disclosed at 1:1-5:12 and illustrated in Fig. 1.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

11. Claims 27-77, 83-89, 99-104, and 106, are rejected under 35 U.S.C. 103(a) as being unpatentable over Henshaw et al. (US 4,407,712 A), cited above, and further in view of Groves et al. (WO 01/90438 A1).

12. Groves teaches a process and apparatus similar to that of Henshaw and further suggests manipulating the vapor flux to achieve desired coating effects. It is the Primary Examiner's position that changing the flux length, width, etc., by adjusting pressure and utilizing baffled and masks are readily obvious expedients to control such a vapor flux and would have been obvious to one of ordinary skill in the art.
